

## Setting Up The Printer

Step 1: Insert paper tray at front

Step 2: Power up using the correct power adaptor for the printer

Step 3: Press the ON button on top of the printer

The printer will be configured to automatically work with the booth and should connect wirelessly

You may need to add paper and/or change the ink during the hire  
If this happens use the provided paper (loaded shiny side up) and the ink cartridge is gently replaced via the right side door, do not force ink cartridges in as this will cause damage that will render the printer unusable permanently.
