SIMPLE BOOTH V2

Set-up & Operating Instructions

***DO NOT ACTIVATE THE BOOTH
UNTIL THE DAY OF THE EVENT***

Once activated the booth must remain powered

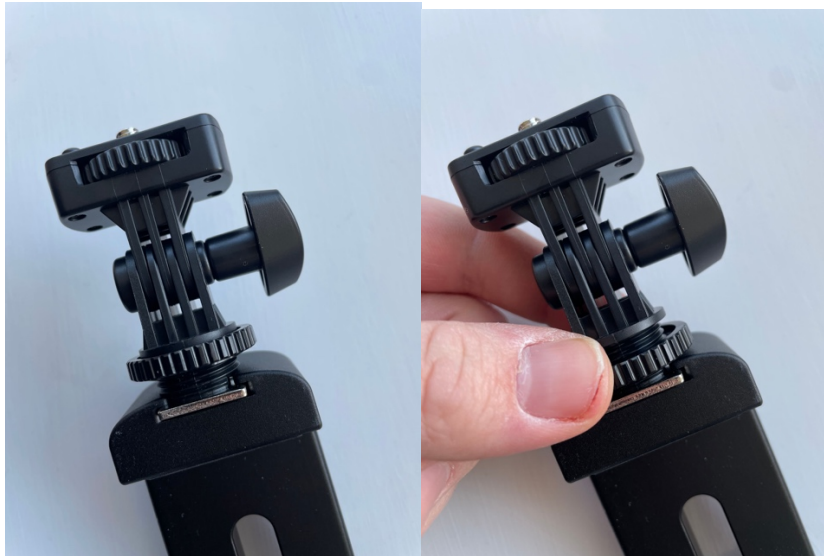

BUILD THE STAND

Step 1: Open the catches and extend the stand to the desired height. Close catches to secure height, all 3 legs must be at the same height.

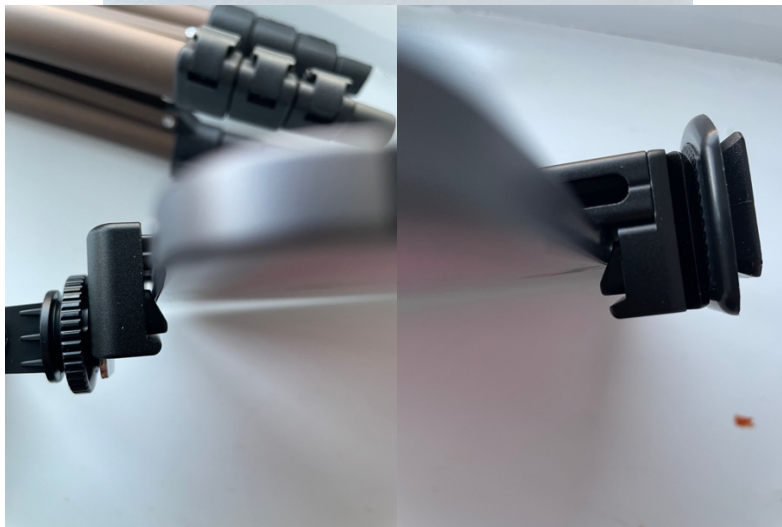

Step 2: Open the flip catch on the top of the booth, and attach the head unit. Close catch and ensure its fitted securely.

Step 3: Attach light to top of the stand
Light unit slides into place, and use the dial to tighten to the stand

Step 4: Fit light stand to the light
Use the dial to secure unit – ensure holes match up. Check unit is fully secure before using

Step 5: Fit the ipad to the stand, use the dial on the back of the unit to adjust the stand to open for the ipad. Ipad should be fitted in portrait (as shown on front page)

Ensure ipad securely fitted so it cannot be removed, or fall out.

Step 6: Use the provided power leads to power the unit

Step 7: Use the light at 5600K for optimum results.

Step 8: Only activate the screen once the event is ready to start.
